

Help people with diabetes control their ABCs to reduce their risk of heart attacks and strokes.

Cardiovascular disease (CVD) is the leading killer of people with diabetes. Yet, only one in three people with diabetes consider CVD to be a serious complication of diabetes. To lower their risk of heart attack and stroke, people with diabetes need to manage their **ABCs**:

A1C (Blood Glucose)
Blood Pressure
Cholesterol

The NDEP has free materials to help people with diabetes **make the link between diabetes and heart disease and stroke**. Materials are available in English, Spanish, and 15 Asian and Pacific Islander languages. All have a record form for tracking the ABCs to help control CVD risk factors.

IN ENGLISH:

Be Smart About Your
 Heart: Control the
 ABCs of Diabetes

IN SPANISH:

Si Tiene Diabetes,
 Cuide Su Corazón
 (If you have diabetes,
 take care of your heart)

IN ASIAN AND PACIFIC ISLANDER LANGUAGES:

Take Care of Your Heart. Manage Your Diabetes
 handouts for people with diabetes, available in:

- | | | | |
|-------------|------------|------------|--------------|
| ♥ Cambodian | ♥ English | ♥ Japanese | ♥ Tagalog |
| ♥ Chamorro | ♥ Gujarati | ♥ Korean | ♥ Thai |
| ♥ Chinese | ♥ Hindi | ♥ Lao | ♥ Tongan |
| ♥ Chuukese | ♥ Hmong | ♥ Samoan | ♥ Vietnamese |

Electronic versions of all materials are available on the NDEP website, www.ndep.nih.gov. Ordering information is on the back.

All materials are copyright-free and may be reproduced and distributed without permission.
